## CLINICAL EXPERIENCE

*Name Of Hospital, City, ST (80+ Hours – ER, NICU, L&D, Triage & OR)*

- Under RN Preceptor supervision, provided care to children and families experiencing acute medical-surgical health alterations and emergencies, and expertly triaged patients per condition severity.
- Performed pre- and post-partum assessments, including delivering neonate care such as bathing, feeding, and diapering, as well as continually assessing patients' respiratory and cardiovascular functions.
- Built knowledge of OR circulatory nurse duties, including performing proper pre-surgery scrub techniques, as well as leading routine IV, NG, and Foley insertion with medication administration.

*Name Of Hospital, City, ST (60+ Hours – ICU)*

- Performed blood draws and cultures, IV insertion, and medication administration for patients, as well as patient tracheostomy care, cannula changes, open and closed suctioning, and NG tube insertion.
- Administered medications and feedings through NG and gastrostomy tubes, and maintained ventilators.

*Name Of Rehabilitation, City, ST (30 Hours – Med-Surg)*

- Mastered patient blood draws and IV insertion, and administered diverse medications.

*Name Of Rehabilitation Hospital, City, ST (80+ Hours – Post-Acute Healthcare Services)*

- Evaluated educational and discharge needs to formulate nursing diagnoses, including administering medication, inserting Foley catheters, and handling PICC line dressing changes and wound care.
- Prioritized patient goals for enhanced wellness behavior and optimal independence.

*Name, City, ST (80+ Hours – Home Health Care)*

- Spearheaded comprehensive head-to-toe assessments for patients within a home health care setting, including focusing on cardiovascular, respiratory, and neurological functions, as well as handling wound care (i.e. debridement, venous stasis wraps, and wound packing) and updating progress assessments.

*NameOf Behavioral Institute, City, ST (30 Hours – Mental Health)*

- Employed rapid de-escalation techniques to manage persons' emotions and behavior, along with assessing risk, performing mini mental exams, leading group and 1:1 therapy sessions, and building patient relations.
